**To:** Houle, Brian (Crofton)  
**Subject:** Watershed update: June 27, 2022

Good day,

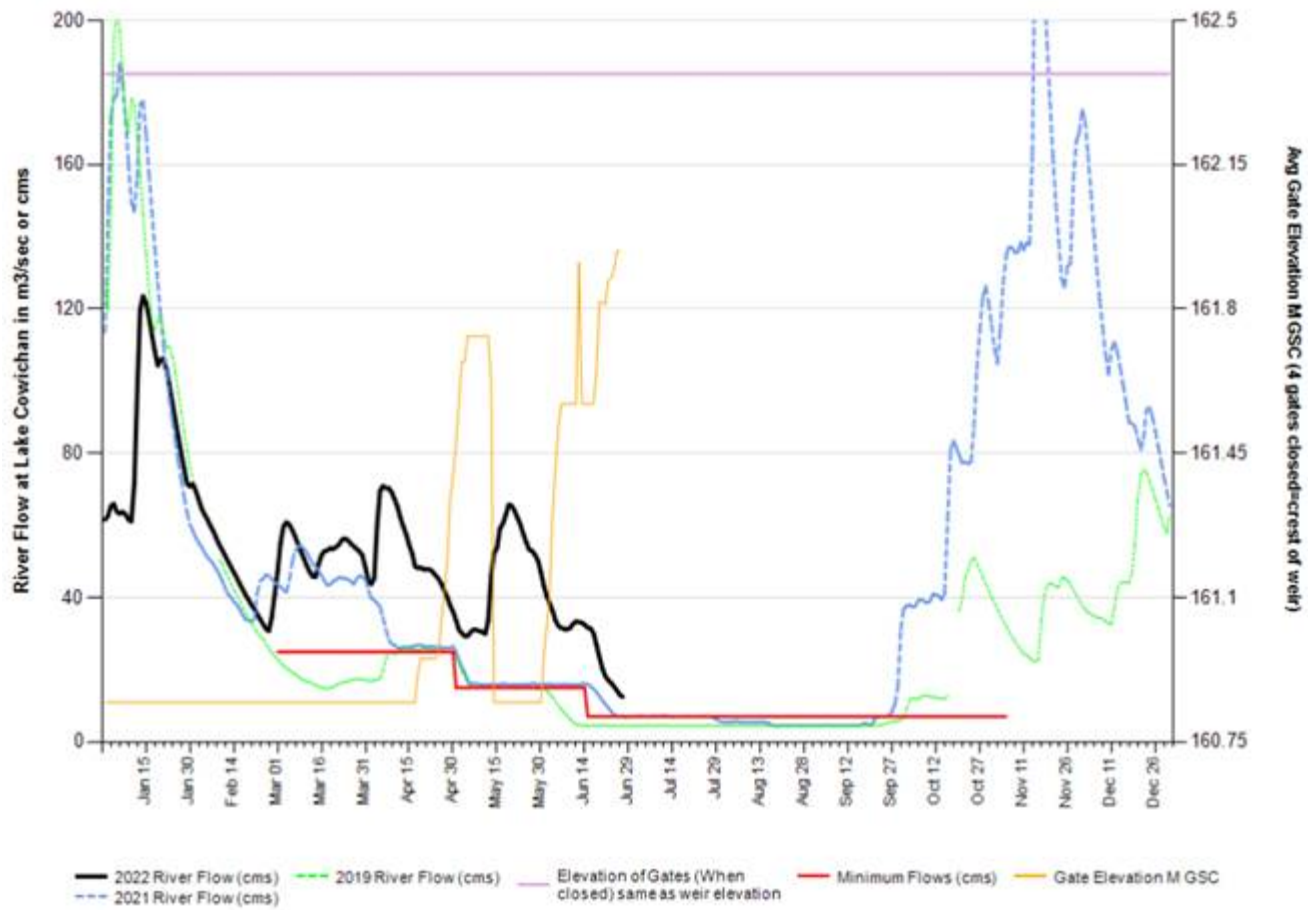

Conditions remain excellent within watershed with lake still at 100% full and flow still elevated at 13 cms. Weather forecast again includes rainfall and snow pack continues to melt and helping keep river flows higher than seasonal normal. River flow from Cowichan Lake will slowly be ramped down to seasonal 7 cms and it is not clear when river will be at 7 cms yet. Once the river is at 7 cms, it is expected that we will be able to sustain 7 cms until return of rainfall this fall.

Regards,
